DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4-11, 13-14 16-17, 19, and 21-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Levinson et al. Levinson et al discloses a waveguide 130 with a phosphor film or layer (140), the waveguide having a direction along a long longitudinal dimension and an exit region at an end of the longitudinal dimension; and an excitation source (110) that directs excitation energy at the waveguide other than in the waveguide direction such that light is generated in the phosphor film in and/or parallel to a waveguide direction and exits through the exit region. The waveguide further includes a reflective coating (see column 4, lines 48-59)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14, 16-17 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over (Thorgerson et al or Mori) in view of Caldwell in view of Levinson et al. (Thorgerson et al or Mori) discloses the claimed invention except for the phosphor region. Levinson et al teaches that it is advantageous to use phosphor films or layers with waveguides to provide efficient illumination along the length of the waveguide. It would have been obvious to one skilled in the art at the time the invention was made to modify the waveguides of (Thorgerson et al or Mori) to include a phosphorescent layer or film as taught by Levinson et al in order to provide efficient illumination along the length of the waveguide as taught by Levinson et al.

Response to Arguments

4. Applicant's arguments with respect to claims 1-14, 16-17 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

NOT A MACHINE COPY

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
